

VICTORY ROADS

LAPLAND - THE LAND OF THE MIDNIGHT SUN, CIRCA 2760 KM IN 13 DAYS

DAY 1: Arrival. Overnight stay at ICEHOTEL.

DAY 2: The trip begins and ends in Jukkasjärvi. The first day of the trip takes you through Europe's largest municipality, and you get a sense of the endless expanses of Swedish Lapland. The trip takes you all the way to the Muonio river, at the border to Finland. In Finnish Muonio the Harriniva Hotel resort is located.

DAY 3: The Muonio River flows into the Torne River. The rivers in this region are some of the last unregulated rivers in Europe and they all have drinkable water. The tour of the day also takes you through Pallastunturi National Park, before you reach the North Finnish tundra at Ivalo. Steppe and heathland with numerous lakes and forests characterize this region.

DAY 4: Today you switch from Finnish Lapland to the Norwegian Finnmark, which is named after the original Finnish population that lived here. The Finnish landscape with its many lakes is exchanged for a mountainous, elongated Norwegian fjord country. Norway's third largest fjord is the goal of today. At Lakselv you reach Porsanger Fjord. Between the fjord and the village Walsund Skaidi, which is an ideal base for excursions to the North Cape and Hammerfest.

DAY 5: Visit Nordkap, the northernmost point of Europe, reachable by car. Here at 71 ° latitude you have a fantastic view from the 304 meter high cliff.

DAY 6: Hammerfest is the world's northernmost town. The barren landscape, which makes one think of Lord of the Rings, is fascinating. Through the large amount of natural gas exploration in the Arctic Ocean, this is a steadily growing city on the edge of Europe. From the panorama café Turistua you can look out over the sea, and follow the midnight sun, which can still be seen at the beginning of August. And even after that, the night will remain bright for many hours.

DAY 7: Through the gracing land of the reindeers, the trip for the day takes you to the Arctic coast at Alta. Here, a visit to the rock carvings at Alta Fjord, which since 1985 can be found on the UNESCO World Heritage list, is recommended. The coast road impresses with its dramatic views and after two fjord crossings you will reach the university city of Tromsø, a metropolis north of the Arctic Circle.

DAY 8: The journey along Bålsfjorden offers amazing views, and takes you to the Atlantic coast's islands. You will reach Sørrolnæs, where the fjord ferry will take you directly to the area's main town, Harstad, located on Norway's largest island, Hinnøya.

DAY 9: From Harstad the trip goes to Vesterålen islands. Andøya island is worth visiting. Andenes is known for its abundance of sperm whales that can be found off the coast. From mid-May to mid-September whale safaris are arranged daily.

DAY 10: Again, the landscape is changing. The nature around the island Andøya feels almost unreal. Clear water with white sand beaches provide a sense of the South Sea. This is in stark contrast to the bare mountain landscape. On the west side sits the small town Bleik, with a beautiful coastline.

DAY 11: A fjord ferry takes you to the Lofoten islands. Svolvær is the archipelago's largest city. Here one encounters tourists from all over the world. Continuing along the south coast you come to Henningsvær, a small artists village. Here you can enjoy the special atmosphere of a small artist café. The tour takes you all the way to Sortland, and back to Stokmarknes. In Andenes the local museum is worth a visit.

DAY 12: Yet again the nature is changing. From the Norwegian islands and fjords the trip takes you into the Swedish mountain landscape, along Sweden's most beautiful road. Lappporten marks the beginning of Europe's oldest national park. Overnight stay in Abisko.

DAY 13: Along Torne Träsk you travel back to Kiruna. The round trip ends at ICEHOTEL in Jukkasjärvi. A visit to the mine is recommended. Overnight stay at ICEHOTEL.

DAY 14: Departure.
