## NORDLAND MEETS NORDKAP (VIA ARCTICA), CIRCA 2200 KM IN 7 DAYS

**DAY 1:** Arrival. Overnight stay at ICEHOTEL.

**DAY 2:** Your first day takes you from ICEHOTEL via one of Scandinavia's most beautiful roads. Along the Torne Träsk lake you travel past Lapporten, one of Swedish Lapland's best known panoramas. At the border you leave Sweden and enter into Norway. The nature constantly changes between mountains and fjords. Along the Ofotfjord you arrive in Tromsø, the world's northernmost university, a vibrant and rich city far north of the Polar Circle.

**DAY 3:** From Tromsø your journey takes you north on a very varied part of the E6 road. The glacier Okstind is just one of many natural landmarks along the way. Today's goal is Alta at the Atlantic coast.

**DAY 4:** Along Norway's third largest fjord, the Porsangerfjord, you continue straight to the Nordkap. The chances of a fog-free view is best during the day. After this highlight you travel to the world's northernmost city, Hammerfest, which is the best place to see the midnight sun (if you haven't already seen it during your trip).

**DAY 5:** After the endless expanses of the Finnmark, the landscape shifts again, and there are more woods and lakes. End goal is Ivalo, the main town of Finnish Lapland.

**DAY 6:** From Ivalo you go through the Sami's biggest grazing land for their reindeers, so the chances are good to see these animals. This is a good opportunity to make a stop at one of the many lakes along the road to make a picnic. Today's goal is Muonio.

**DAY 7:** From Muonio you go back to Kiruna. Along the way you travel along the Lainio, Torne and Kalix river. Back in Kiruna the church, city hall, and of course the world's biggest iron ore mine, are worth a visit. Overnight stay at ICEHOTEL.

**DAY 8:** Departure.
